

DISINFECTION SWAB

For all-purpose disinfection in health care Teampac offers an individually packed wipe, certified as a medical device within EU.

The wipe contains 70 % ethanol for general antiseptic effect. 1 % Glycerol is added for skin care. The wipe size and material is also suited for surface disinfection.

Each wipe contains ca. 2.1 g of disinfectant which keeps the hands moist for 20 seconds. For methods EN 1500 (hygienic hand disinfection) or EN 12791 (surgical hand disinfection) use of two or more wipes is recommended.

- Wipe size: 140×190 mm (5.5×7.5")
